DEREK CHIBUZOR

Los Angeles, CA | (201) 316-3229 | derekchibuzor777@gmail.com | linkedin.com/in/derekchibuzor | derekc22.github.io

EDUCATION

University of Southern California Los Angeles, CA

Master of Science in Mechanical Engineering Aug. 2025-Dec. 2026

* GPA: 3.90/4.00 | Mechatronic Systems, Robot Dynamics & Control, Linear Systems, Flight Vehicle Stability & Control

Bachelor of Science in Aerospace Engineering Aug. 2021-May 2025

* GPA: 3.62/4.00 | Computer-aided Design, Dynamic Systems, Linear Control, Computational Methods, Flight Mechanics

WORK EXPERIENCE

Neros Technologies El Segundo, CA

Autonomy – Controls Engineer Jan. 2026-Present

* Develop, implement, and tune **flight control algorithms** that directly enable **advanced autonomy** onboard the Archer AI system.

Dynamic Robotics and Control Laboratory Los Angeles, CA

Research Assistant - Software Jan. 2025-Present

* Developed IK joint-space **PD controller** for 16-DOF robot, enabling leg trajectory data generation for system identification tasks.
* Engineered **system identification** framework for **Sim2Real** transfer via gradient- and sampling-based **hybrid optimization**.
* Trained **evolutionary algorithms** and residual physics networks to model actuator dynamics for 24-DOF robot, reducing error by 78%.
* Constructed **diffusion model** framework for generating full-body loco-manipulation trajectories from Unitree G1 motion capture data.

Lawrence Livermore National Laboratory Livermore, CA

Computational Engineer Intern June 2025-Aug. 2025

* Wrote IK task-space **PD controller** for 6-DOF UR3e, saving 5+ hours of manual path planning while achieving 0.1 mm tracking error.
* Trained **reinforcement learning** policies for pick and place tasks, reducing episode length by 20% with transformer feature extractor.
* Utilized implicit and explicit **structural dynamics** codes to perform **modal analysis** of jointed beam subject to broadband excitation.

Northrop Grumman Roy, UT

Mechanical Engineer Intern June 2023-Aug. 2024

* Constructed 2-DOF reduced-order **Simulink** model of **shock-isolated system**, saving 240 hours of full-scale FEA computation.
* Wrote **post-processing** scripts to characterize transient responses of 5 subterranean structures subject to 11 seismic excitations.
* Designed **CAD** assemblies, performed **FEA**, and wrote RFIs for elastomeric shock isolators and subterranean maintenance access doors.

Amazon & Information Sciences Institute Los Angeles, CA

GNC Engineer Intern June 2022-Aug. 2022

* Developed **vision-based navigation** software, enabling **pose estimation** for 3-DOF rendezvous and proximity operations (**RPO**).
* Achieved sub-160 ms latency localization and tracking of 12 infrared LED targets up to 2.50 m from **Raspberry Pi** NoIR camera.

SKILLS & CREDENTIALS

* **Engineering:** Siemens NX, Simulink, LabVIEW, Abaqus
* **Other:** PyTorch, MuJoCo, CasADi, JAX, Gymnasium, Stable-Baselines3, OpenCV, ROS2
* **Programming:** Python, C++, MATLAB, Java, JavaScript
* **Skills:** Robotics, Dynamics, Control, GNC, Optimal Control, Trajectory Optimization, System Identification, CAD, GD&T, FEA

PROJECTS

*** Multi-Agent DMPC**: Distributed and decentralized model predictive control (DMPC) for high-DOF multi-agent systems.

*** Bipedal Robot Control:** Various controllers (e.g., QP, PD, MPC) for 7-DOF bipedal robot balancing, walking, and running.

*** Dual-Axis Control System**: Sun-seeking, multithreaded, 2-DOF electromechanical solar array articulation module for 3U CubeSat.
